2021 – 2025

SSCE

Kings Anchor College, Lagos
2015

OLUWADUROTIWA AKINBO

Full-Stack Web Developer

PROFILE

Full-stack web developer with 6+ years of experience building responsive, production web applications across the front end and back end. Proven remote-work track record, currently developing software for a US-based company. Strong in Laravel/PHP, JavaScript, and MySQL, with additional experience in Flutter, WordPress, and cloud/data tooling. Skilled in using AI tools, including Claude, to accelerate development, debugging, documentation, and code review. Comfortable working asynchronously across time zones, with a track record of shipping clean, well-structured, maintainable code.

WORK EXPERIENCE

Full-Stack Developer (Remote) — Edoubleone — United States. *Feb 2026 – Present*

Remote full-stack developer for a US-based company, working asynchronously with an international team.

- Develop and maintain web application features end-to-end, coordinating with a distributed US-based team.
- Apply front-end and back-end best practices to deliver reliable, production-ready code on schedule.
- Use Claude and other AI coding assistants to speed up development, catch bugs earlier, and keep documentation current.
- Communicate progress, blockers, and technical decisions clearly in an async, remote-first environment.

Full-Stack Web Developer — Tishri Infotech Nig Ltd — Lagos, Nigeria. *2018 – Jan 2026*

- Designed, developed, and maintained responsive web applications, including an in-house Human Resource Management System built with Laravel, Filament, and MySQL.
- Delivered front-end and back-end features using HTML, CSS, JavaScript, PHP, Flutter, SQL, and Firebase.
- Built scalable, user-centric solutions using Laravel, WordPress, Docker, Git, Bootstrap, and Tailwind.
- Configured and managed networking infrastructure, including routers as access points/repeaters/bridges and Starlink deployments.
- Used Claude and other generative AI tools (ChatGPT, DALL·E, Midjourney) for content creation, automation, research, and prompt-driven workflows.
- Worked with Power BI, Python, SQL, and R for data modelling and KPI-driven business insights.

SELECTED PROJECTS

HR Management System — Laravel, Filament, MySQL

- Employees, attendance, leave, payroll with PDF payslips, and recruitment in one role-aware system with six permission-based roles.

NairaFlow — Laravel, Filament, Spatie Permission

- Currency exchange ledger with maker-checker approvals, atomic posting, nightly reconciliation and a full audit trail.

Service Tracker — Laravel, Filament, Livewire

- Service and attendance tracking for three congregations, with scoped access, follow-ups and comparison reports.

Bookshelf — Laravel, Filament, Livewire, Sanctum

- Personal web-novel library with inferred reading statuses, tags, a REST API and a translating twkan.com importer.
